3335EL/7S

Evaporating Pressure Regulator CO2
7/8"-22mm ODS
PS = 60 bar

Product use

These are regulators designed to maintain a constant evaporating pressure and thereby a constant surface temperature on the evaporator under varying evaporator loads. This regulator prevents too low evaporating pressure and therefore protects the water chiller from freezing or the formation of ice in air evaporators. Accessories for use with refrigerant R744.
